

## SCIENTIFIC NOTES

**ADDENDA CORRIGENDA FOR THE TURKISH LIST OF  
LONGHORNED BEETLE TAXA OF ÖZDİKMEN, 2012  
(COLEOPTERA: CERAMBYCOIDEA, CERAMBYCIDAE)****Hüseyin Özdikmen\***

[**Özdikmen, H.** 2012. Addenda corrigenda for the Turkish list of Longhorned Beetle taxa of Özdikmen, 2012 (Coleoptera: Cerambycoidea, Cerambycidae). *Munis Entomology & Zoology*, 7 (2): 1284-1286]

The naked list of Turkish Cerambycoidea was published by Özdikmen (2012) in January. In accordance with this, the families Cerambycidae and Vesperidae are represented in Turkey. According to Özdikmen (2012), Turkish Cerambycoidea includes a total of 800 taxa (699 species and 101 subspecies belonging to 130 genera of 56 tribes of 12 subfamilies of 2 families).

**Addenda corrigenda:**

The following taxa should be added to the Turkish list.

4 species and 1 subspecies from 2009:

*Cortodera flavimana corallipes* Pesarini & Sabbadini, 2009  
*Cortodera zoi* Pesarini & Sabbadini, 2009  
*Dorcadion intrusum* Pesarini & Sabbadini, 2009  
*Dorcadion pergamenum* Pesarini & Sabbadini, 2009  
*Phytoecia longicornis* (Pesarini & Sabbadini, 2009) (*Neomusaria*)

6 species and 1 subspecies from 2010:

*Dorcadion akpinarense* Bernhauer & Peks, 2010  
*Dorcadion bernhauerorum* Peks, 2010  
*Dorcadion inikliense* Bernhauer & Peks, 2010  
*Dorcadion kazanciense* Bernhauer & Peks, 2010  
*Dorcadion lodosi abanozense* Bernhauer & Peks, 2010  
*Dorcadion peksi* Bernhauer, 2010  
*Phytoecia volkovitshi* Danilevsky, 2010

1 subgenus from 2011:

Subgenus *Metallidia* Kasatkin, 2011

2 species from 2011:

*Dorcadion ivani* Pesarini & Sabbadini, 2011  
*Phytoecia alinae* Kasatkin, 2011

1 subgenus from 2012:

Subgenus *Anatolomallosia* Özdikmen & Aytar, 2012

9 species and 3 subspecies from 2012:

*Cortodera aksarayensis* Özdikmen & Özbek, 2012  
*Cortodera pumila meltemae* Özdikmen, Mercan, Cihan, 2012  
*Stenurella sabiniae* Rapuzzi & Sama, 2012  
*Stenurella solaris* Rapuzzi & Sama, 2012  
*Asemum tenuicorne claricostulatum* Özdikmen & Aytar, 2012  
*Deilus rugosicollis* Rapuzzi & Sama, 2012  
*Isotomus comptus meridionalis* Özdikmen & Aytar, 2012  
*Pogonocherus barbarae* Rapuzzi & Sama, 2012  
*Leiopus lisae* Rapuzzi & Sama, 2012  
*Mallosia nonnigra* Özdikmen & Aytar, 2012  
*Agapanthia naciyaee* Rapuzzi & Sama, 2012  
*Agapanthia ozdikmeni* Rapuzzi & Sama, 2012

Moreover;

*Stenurella bifasciata ferruginipes* that was described by Pic (1895) with the original combination *Strangalia bifasciata* v. *ferruginipes* Pic, 1895, was ranked as a separate species of *Stenurella* by Rapuzzi & Sama (2012).

The following taxa should be removed to the Turkish list.

#### *Dorcadion naciyaee*

It was given as only the name without description in Sama et al. (2012). Rapuzzi & Sama (2012) stated that “*We had the opportunity to collect a small series of this Taxon in Beypinari (Sivas province, Turkey). Firstly we thought that these specimens belong to a new species (Sama, Rapuzzi & Ozdikmen, 2012) and later, after a deeper study of all this group, we understand that our specimens are not a new taxon but they belong to D. (Pedestredorcadion) semivelutinum a rare and poorly known species*”. So, the name should be removed from the Turkish list.

Consequently, Turkish Cerambycoidea includes a total of 824 taxa (721 species and 103 subspecies belonging to 130 genera of 56 tribes of 12 subfamilies of 2 families) now with the given taxa in the present text.
